Name (optional):

Address (optional):

With this project, VDOT proposes to widen a 1.8 mile section of Route 29 from Polo Grounds Road north to Towncenter Drive by adding an additional lane in each direction. The project will improve safety and increase capacity on this section of the highway. The improvements will also include reconstructing sections of the existing roadway north and south of Ashwood Boulevard to increase sight distances and safety improvements at other identified locations.

This section of Route 29 has been identified as a high priority for improvements to enhance safety. Do you believe the project design presented tonight will improve safety on Route 29? If not, what modifications would you suggest?

Do you support a paved multi-use trail rather than a sidewalk on the east side of this project?

Please provide us with any additional information that you believe will assist in further development of the design of this project:

How did you hear about this meeting (check all that apply)?
