Find out about plans to rehabilitate and widen the westbound Route 7 (Leesburg Pike) bridge over Sugarland Run in order to improve safety and extend the overall life of the bridge. The bridge was built in 1947.

The planned improvements include a new, wider concrete bridge deck and widening and repairing the bridge pier and abutments. The project will also extend the acceleration lane from the Fairfax County Parkway (Route 286) on-ramp to Dranesville Road (Route 228) to improve operations. Other improvements include guardrail upgrades and new curb and gutter in the area of the bridge.

Pursuant with the National Environmental Policy Act (NEPA) and 23 CFR 771, a Programmatic Categorical Exclusion (PCE) was prepared under agreement with the Federal Highway Administration. In compliance with the National Historic Preservation Act, Section 106 and 36 CFR Part 800, information concerning the potential effects of the proposed improvements on properties listed in or eligible for listing in the National Register of Historic Places will be available with the PCE.

Stop by between 6:30 p.m. and 8:30 p.m. to view displays and learn more about the project. A presentation will begin at 7 p.m. Project staff will be available to answer your questions.
