**SCHEDULE UPDATE: GRAYSON ROAD TO CLOSE TEMPORARILY
DURING UTILITY WORK**

Closure limited to off-peak, evening hours to minimize traffic impacts

Editor's Note: This work has been rescheduled and is now slated to begin as early as the end of October. The Virginia Department of Transportation will communicate a new start date, once it is determined. This news release has been updated to reflect the rescheduled work.

VIRGINIA BEACH – As work continues on Phase II of the I-64/264 Interchange Improvements Project in Virginia Beach, crews will temporarily close Grayson Road to through traffic, **starting as early as the end of October.**

In an effort to limit impacts to the traveling public, the Grayson Road closure, located near Witchduck Road and the I-264 interchange, will be limited to **off-peak, evening hours: Monday through Friday from 9 p.m. to 5 a.m., with some weekend, night work possible.** Turn lanes from Witchduck Road onto Grayson Road at Greenwich Road will also be closed during this time.

At all other times, the road will be open to through traffic, meaning that vehicles can travel from one end of Grayson Road to the other.

Local traffic access will be maintained throughout the duration of the work, allowing property owners and patrons to access the properties along Grayson Road **at all times**.

Rouse Drive will remain open to traffic at all times.

A signed detour will direct motorists to use Witchduck Road and Bonney Road to get around the closure, when it's in place.

The location of the Grayson Road utility work is indicated by the blue and white icon on the above map, with the road closure indicated by black lines. While the work is underway, Grayson Road will be closed to through traffic, with turns onto Grayson Road from Witchduck Road at Greenwich Road also restricted. Rouse Drive will remain open.

For more information on the improvements coming to the I-64/I-264 Interchange and the Newtown and Witchduck ramps, visit www.i64i264improvements.org.
