

Minutes In Blue

May 8, 2007

**Begin Time 2P
End Time 2:30P**

NVUCC Meeting – 05/08/2007 – 1P

Facility Tour:

Mark with Fairfax Water gave a power point presentation about the new facility.

All enjoyed the tour and gained a heightened appreciation for process that protects our water.

Questions?

What if a drought occurs?

Our area has two water sources to draw from at all times.

What is the maximum demand the new facility can handle?

The water level is maintained at 85% full. The lowest level reached was down the 20% level.

Introduction:

A special thank you was extended to Jeannie Swim for arranging the meeting location and tour.

Minutes:

Minutes from the March meeting still need to be prepared and distributed.

Multi-Party Aerial Transfer Progress:

Denise Stevens with Dominion Virginia Power (DVP) has successfully initiated the use of Pike to accomplish the large Nextel project. In time this process can be used with other jobs. For now the only three companies involved are DVP, Cox, and Verizon Virginia, Inc. An excellent suggestion is to use this process with pole damage in an emergency. We are still working to resolve the permit issues.

NVUCC open Discussion:

A Miss Utility representative is scheduled to attend the July meeting.

A reminder was given to place the lowest attachment height on new pole placement in the NJUN's database.

The NVUCC website developed by Heidi Galvin is a useful tool. Our gratitude was extended to Heidi for her continued extra effort in this regard.

Tom Robinson with the Prince William County Sanitation authority brought to our attention the need to alert sub-contractors excavating over their facilities both water and sanitary sewer. This emphasizes the need to utilize the contact information on the NVUCC website.

Next Meeting:

The next meeting is scheduled for July 10, 2007 at the Fairfax office of Dominion Virginia Power. The address will be circulated around at a later date.
