Notes from the Contract Engineer for January 2009

- This is an advanced notice of an impending change to the Bid Express Contractor Billing System that will take place effective April 1, 2009.

Electronic bid bond validation is a valuable service to Bid Express subscribers in those states that have implemented this process. In order to maintain this feature at an economical rate, we need to simplify the fee collection process for our surety agency partners. Since we already have a successful credit card billing system in place for Bid Express Services, our surety partners have elected to stop collecting from bidders that portion of their annual electronic bid bond fee that is payable to bid Express for the on-line validation service and instead have that portion of the fee collected directly by Bid Express. To be clear, the charge from Bid Express replaces a portion of the annual fee for electronic bid bond validation that was previously being collected by the surety agency and is not a new fee.

Effective April 1, 2009, BidX.com will implement changes to the Bid Express fee schedule as follows:

- For those prime contractors using the electronic bid bond validation feature available on Bid Express, the fee for Electronic bid bond validation will be \$5.00 per month payable to Bid Express through the standard credit card billing system.

This change will allow us to better accommodate the surety vendors that provide excellent, convenient service and will streamline the fee collection associated with the internet bidding. Our commitment to consistent, reliable service continues. If you have any questions about this change, please contact me at (352) 381-4888.

INFORMATION

- Most projects on the current advertisements are now governed by the newly released 2007 Road and Bridge Specifications. Please be sure to examine the proposal to determine which edition applies. Under the 2007 Specifications the Standards and Specification books are no longer supplied free of charge with the award of a project. Contractors may purchase the new 2007 edition from the plan room for \$10 each. The 2001 edition of the Road and Bridge Standards is still in use and may be purchased for \$50 per set. A new edition of the Standards has been prepared and will be available for use and sale in 2009.
- You can order plans and proposals via e-mail. The order form will be available on line at www.virginiadot.org/business/const and will be a fill it form. Once you complete the form you may e-mail it to vdotcoplanroom@vdot.virginia.gov.
- When acknowledging Revisions please be sure to read “Electronic Bidding Procedures – Detail Amendment Process” under Electronic Bidding at the Construction and Maintenance Website prior to submitting a bid. Bid Express will alert you only of an amendment to the Schedule of Bid Items. All other changes such as time limits, specs. plan changes, etc. will not show up in BidX. As always, plan revisions are mailed to plan holders. However, to ensure you have all revisions you must check the advertisement page (CABB website) @ <http://www.virginiadot.org/business/const>. Revisions are noted in the third column under “Notices”. There is a link from BidX to this site. **Failure to acknowledge Revisions will result in rejection of Bids.**
- If you do not purchase paper plans or proposals from the VDOT plan room, I cannot notify you of plan revisions. It is your responsibility to check in NOTICES on the VDOT advertisement page for Revisions.
- Notice that the approximate value of advertised work is included on the paper and website advertisement. This is the cash forecast estimate and **NOT** the Engineer’s Estimate. It contains Engineering, State Force Work & Contingencies, as well as the construction costs. This should be used only to judge the relative size of the job.
- Electronic Plans are available during the advertisement cycle. This can help you decide whether you are interested in bidding on a job. You can look at the plans and proposal on-line before you buy paper plans on the website at www.virginiadot.org/business/const. Under “all things advertisement” click on “instructions for utilizing the Falcon Website. Call me if you need more information.
- Use CABB (Contractor’s Advertisement Bulletin Board) to ask questions about a job. Just click on the “?” on the advertisement page. It is the only way to ask questions during advertisement. You must be a plan holder to ask questions. If no questions have been asked, the question mark is **BLUE**. It will be **RED** if questions have been asked.
- If you have questions about the website, please contact Mary Roane at 804-786-2124.

Don Silies
State Contract Engineer
Virginia Department of Transportation
(804) 786-1630

Important Notice to Bidders

The Governor has determined that all commerce with the Commonwealth of Virginia will utilize one central procurement portal that is common to all agencies. It is called eVa for electronic-Virginia. It is operated under the direction of the Department of General Services (DGS). Beginning with the August 2003 advertisements, all proposals will contain a provision similar to the following:

Section 102 eVA BUSINESS-TO-GOVERNMENT VENDOR REGISTRATION: The eVA Internet electronic procurement solution, web site portal www.eva.state.va.us, streamlines and automates government purchasing activities in the Commonwealth. The portal is the gateway for vendors to conduct business with state agencies and public bodies. All vendors desiring to provide goods and/or services to the Commonwealth shall participate in the eVA Internet e-procurement solution either through the eVA Basic Vendor Registration Service or eVA Premium Vendor Registration Service. All bidders must register in eVA prior to award of any contracts. ***Failure to register will result in the bid being rejected.***

- a. eVA Basic Vendor Registration Service: \$25 Annual Registration Fee ***plus the appropriate order Transaction Fee specified below.*** eVA Basic Vendor Registration Service includes electronic order receipt, vendor catalog posting, and on-line registration. It also includes an electronic bidding system for use for goods and services (not construction). For construction projects, firms will continue to use the Bid Express Internet bidding system.
- b. eVA Premium Vendor Registration Service: **\$25** Annual Registration Fee plus Transaction Fee ***plus the appropriate order Transaction fee specified below.*** eVA Premium Vendor Registration Service includes all benefits of the eVA Basic Vendor Registration Service plus automatic email or fax notification of solicitations and amendments, and ability to research *eVa* historical procurement data, as they become available.
- c. ***For orders issued prior to July 1, 2006, the Vendor Transaction Fee is 1%, capped at a maximum of \$500 per order.***
- d. ***For orders issued July 1, 2006 and after, the Vendor Transaction Fee is:***
 - i) ***DMBE-certified Woman-Owned Businesses: 1%, capped at \$1,500 per order.***
 - ii) ***DMBE-certified Minority-Owned Businesses: 1%, capped at \$1,500 per order.***
 - iii) ***Other Businesses not specified in (i) or (ii) above: 1% capped at \$1,500 per order.***
 - iv) ***DMBE-certified Small Business: 1%, capped at \$500 per order***

This provision requires firms to register with *eVa* and pay the annual fee. The \$25 basic fee (payable directly to *eVa*), should be all most contractors will need. VDOT will continue to supply all the same services that we have always supplied, including direct mailing of the monthly advertisement schedule. If you are awarded a contract, your firm will be billed a Transaction fee by *eVa* after your first estimate is generated. This fee is charged once for each contract awarded, and is used to defray the cost to operate the *eVa* system.

The *eVa* system is completely separate from all other bidding requirements to participate in VDOT's construction program. All contractors still must be prequalified; and firms must be enrolled in BidX, if they desire to bid electronically.

Note: If your proposal contains the above specification, the contract will be awarded only if you are registered in *eVa* prior to execution of the contract.

I understand the registration process is quickly and easily done on line. I suggest that you register at your earliest convenience to avoid Internet registration traffic.

Don Silies
Contract Engineer

VDOT Work Zone Traffic Control Training Requirements

The FHWA past a final rule on Work Zone Safety and Mobility which now requires work zone safety training in the Code of Federal Regulations. Section 23 CFR 630 Subpart J (d) states “Training – States shall require that personnel involved in the development, design, implementation, operation, inspection, and enforcement of work zone related transportation management and traffic control be trained, appropriate to the job decisions each individual is required to make. States shall require periodic training updates that reflect changing industry practices and State processes and procedures.”

To meet this training requirement, and to enhance safety for workers and motorist, VDOT, through a Work Zone Safety Training Committee (WZSTC), developed training procedures, approved courses and materials, and defined instructor qualifications. The training procedures are available at the following site:

http://www.virginia-dot.org/business/resources/wztc/wztc_training_procedures.pdf

Training requirements are grouped as follows:

- **Basic Work Zone Traffic Control (WZTC)** – One day training course focused on short term maintenance type activities such as daily shoulder or lane closures, flagging operations and spot traffic control.
- **Intermediate WZTC** – Two day training course focused on long term construction type activities where review of and adjustments made to traffic control may be needed due to changing conditions.
- **Advanced WZTC** – Two day training course focused on the design of traffic control plans.

VDOT will not be providing training for the public; however, the required courses will be available through various VDOT approved private entities. Information on course offerings as well as instructor qualifications for teaching the courses is located at the following site:

http://www.virginia-dot.org/business/resources/wztc/wztc_inst_app_form.pdf

Beginning with **July 2009** advertisements contracts will include language requiring compliance with this program. The program requires that at least one person on each project possess the Intermediate WZTC training, and at least one person on each construction/maintenance operation possess the Basic WZTC training. In addition, at least one person on each project design team shall possess the Advanced WZTC training.

Details of the work zone training information and related program documents are available on the VDOT Traffic Engineering Division web page at the following location:

<http://www.virginia-dot.org/business/trafficeng-WZS.asp> For additional information, you may contact the Chairman of the WZSTC, David Rush, at David.Rush@VDOT.Virginia.gov

Notice of the Advertisement

A “Highways for Life” Project

I-66 at the Intersections with Rte. 50 & Jermantown Road

Fairfax County

Project number 0066-029-767, M501

The Virginia Department of Transportation anticipates advertisement in February 2009 of a national showcase demonstration project that will involve replacement of 800' to 1,020' of the existing jointed concrete pavement with pre-cast, pre-stressed, post-tensioned concrete (PPCP) panels on I-66 west bound, in western Fairfax County. The design for PPCP slabs will be specified on the plans. The project will also include replacement of approximately 1,200' of the existing jointed concrete pavement with pre-cast concrete panels and approximately 1,020 sy of cast-in-place patching on the ramp from I-66 west bound to Route 50 west bound. The design of the pre-cast concrete panels will be performed by the contractor and must provide transverse and longitudinal load transfer between all new panels and between new panels and the existing pavement equivalent to the load transfer provided in standard PR-2. Another unique feature of this project is that the cost of the project is fixed at \$5 million. The basis for award will be on the firm that can supply the largest number of square yards of pavement slabs.

Due to the potential need for submission of proprietary pre-cast systems from non-pre-qualified contractors, interested bidders are strongly encouraged to contact the State Contract Engineer to obtain information regarding qualification requirements for submitting bids on this project. Owners of proprietary pre-cast systems may obtain approval of the system prior to the advertisement date. A copy of the special provisions for the slabs is located on the Construction and Maintenance website at www.virginiadot.org/business/const/default.asp
