Re: Request for Proposals
I-64 Active Traffic and Safety Management System
From: I-64 Mile Marker 96
To: I-64 Mile Marker 107
Albemarle and Augusta Counties, Virginia
State Contract ID No. 0064-007-913, C501
Federal Project No. OC-0642 (164)
Contract ID No. C00104815DB70

Dear Selection Committee:

The Virginia Department of Transportation is looking for a design-build team to design and construct the I-64 Active Traffic and Safety Management System Project in Carroll County, Virginia. The project goal is to allow for better traffic management and improved safety along a rural stretch of I-64 that has a history of multi-vehicle crashes, many resulting in fatalities, often caused or magnified by a deadly combination of inclement weather with low visibility and heavy traffic volumes travelling at excessive speed. The system envisioned will provide better real-time monitoring of weather conditions, traffic flow, and freeway operations which can support increased communications to drivers through additional Dynamic Message signs and new variable speed limit signs that better match travel speeds to the prevailing sight distance. The
work anticipated includes: project management and coordination; preliminary engineering; ITS
design; sign structure and foundation design; clearing and grubbing; infrastructure construction;
ITS device installation and configuration; utility additions, adjustments, and coordination; static
guide sign fabrication and installation; minor temporary roadway improvements; guardrail
installation; system integration; system testing and acceptance; training; system maintenance
until final acceptance; and system documentation.

Richardson-Wayland Electrical Company, LLC (RWEC) and our team have the experience,
skilled engineers, construction staff, equipment, and resources to provide VDOT with superior
design-build services for the I-64 ATSMS Project. RWEC has been in business as an Electrical
and General Contractor for 100 years and as an Electrical Contractor focused on traffic signals
and ITS systems for 30 years. Our staff consists of Master Electricians, Electrical Apprentices,
IMSA Certified Technicians, BICSI Certified Technicians and equipment operators all with
many years of experience in the transportation work place. Much of our work is performed on
streets and highways.

Over the years, RWEC has worked with many of the systems proposed for this project. Our
experience has grown with the transportation market demand. We have worked on projects
involving overhead sign structures, CCTV, dynamic message signs (DMS), overhead directional
signs and vehicle detection systems. We have also worked on projects with associated ITS
components including adaptive signal systems, uninterruptible power supply (UPS) Systems for
traffic control cabinets, and automatic traffic count stations.

RWEC has a long and successful history of working with VDOT and has many ongoing projects
with the Southwest, Central and Northwest Region Operations including current projects through
which RWEC is providing task order based services for traffic signal systems and other ITS
devices.

We have chosen AECOM Technical Services, Inc. (AECOM) as our lead designer because of
their extensive ITS experience throughout the world as well as their specific experience with
VDOT ITS systems and practices, and their experience in providing similar services through
design-build contracting mechanisms. AECOM has recently provided ITS design for major
projects in California, Florida, Pennsylvania, and Ohio, including several design-build contracts.
In Virginia, AECOM has performed upgrades to the ITS Ethernet communications network in
the ERO and designed fiber optic trunk line upgrades along I-95. Finally, through our decades of
work on the Operations and Maintenance contracts in the ERO and more recently in the SWRO, our team understands the equipment, operations, and vision for ITS systems in Virginia.

Additionally, we have included Digital Traffic Systems, Inc. (DTS) as a key subconsultant on this project. DTS is an ITS service provider and Integrated Sensor Systems installation, maintenance, and services company, focused on serving the Transportation Information Systems Sector. The firm is familiar with the project management, scheduling, dispatch, training, and field maintenance skills required to install, commission and maximize the operational performance and utility of fixed and portable ITS devices and traffic sensors for real-time monitoring of transportation network conditions and operations.

DTS has provided VDOT with performance based ITS on-call maintenance services since 2004 under Contract 106-PC and its successor contract 107-FH, in maintaining ITS field devices along the entire I-81 corridor. Under the scope of these contracts, DTS maintains a wide variety of ITS field devices along 500 interstate miles that overlaps two operational regions within Virginia. The deployed ITS assets include:: CCTV cameras (both solar and AC powered sites), remote video encoder technologies, ESS (RWIS) stations, communications networks (including T-1, DSL, and wireless backbones), software systems, Restricted Weather/Fog Warning Systems, In-road Restricted Visibility Lighting, Dynamic Message Signs, Highway Advisory Radio, traffic monitoring devices, and other traffic management field equipment. Emergency corrective response is provided on a 24/7 basis along with scheduled preventive maintenance for enhanced reliability.

DTS, through VDOT Contracts 1005ES, 1006ES, 1007ES, and 1008ES and predecessor contracts, has over 10 years of experience providing VDOT with performance based statewide maintenance services for over 400 Continuous Count Stations and 200 non-intrusive traffic monitoring sites across Virginia. DTS has facilitated many technical and operational enhancements to improve asset performance, data quality, reliability, and importantly, to leverage existing infrastructure to cost effectively deliver both planning and real-time operational data for multiple uses.

Survey services will be provided by Anderson & Associates. Froehling & Robertson will provide Geotechnical and material testing services. NXL Consulting Services is our DBE and will provide quality assurance services on the project. Most team members have worked with the Lead Contractor and/or Lead Designer on numerous successful projects for VDOT.
Our team has thoroughly reviewed the RFP information package, visited the project site, studied the issues, and is prepared to implement this project for VDOT. The following sections respond to the specific requirements of the RFP related to the Letter of Submittal:

Offeror's Legal Name and Address
Richardson-Wayland Electrical Co., LLC
13th Street SW & Memorial Bridge
Roanoke, Virginia 24015

RWEC is organized as a Delaware Corporation and is registered (and in good standing) with the State Corporation Commission.

Declaration of Intent
It is the intent of Richardson-Wayland Electrical Co., LLC to, if selected, enter into a contract with VDOT for the project in accordance with the terms of this RFP.

120 Day Declaration
Richardson-Wayland Electrical Co, LLC hereby declares that the offer represented by the Price Proposal will remain in full force and effect for one hundred twenty (120) days after the date of submission to VDOT.

Point of Contact Information
The Point of Contact for the Offeror is as follows:
Mr. Tom Bell
Vice-President
Richardson-Wayland Electrical Co., LLC
13th Street & Memorial Bridge
Roanoke, Virginia 24015
(540) 344-3244 ext. 247 work
(540) 400-3191 mobile
(540) 777-1204 fax

Principal Officer Information
Same as Point of Contact above
Offeror's Corporate Structure
Richardson-Wayland Electrical Co, LLC, is a limited liability corporation and will serve as the prime/general contractor for the Design-Build Team. All other team members will enter into subcontractor agreements with RWEC. The required bonding will be procured by RWEC and will include both a 100% performance bond and a 100% payment bond.

Lead Contractor
The Lead Contractor for this Project is Richardson-Wayland Electrical Co., LLC.

Lead Designer
The Lead Designer for this contract will be AECOM Technical Services Inc.

Offeror's Prequalification Number
RWEC's VDOT Prequalification Number is R009

DBE Participation
RWEC is committed to achieving a minimum of three percent (3%) DBE participation based on the entire value of the contract.

Interim Milestone and Final Completion Dates
- Interim Milestone: 4/6/2015
- Final Completion: 7/6/2015

RWEC appreciates this opportunity to present our qualifications and price proposal to VDOT for this important design-build project. We are confident that our team can work with VDOT to successfully bring this project to reality.

Sincerely,

[Signature]

Re: I-64 Active Traffic and Safety Management System (ATSMS)
State Project No.: 0064-007-913, C501

To whom it may concern:

It is our understanding that our valued client, Richardson-Wayland Electrical Co., LLC is being considered to act as Contractor on the captioned project.

Richardson-Wayland Electrical Co., LLC is one of our most valued surety clients. We consider the Company to be properly equipped, capably staffed, and well financed. It is our privilege to extend and/or consider supporting Suretyship to this Company on single contracts up to $15,000,000 and contracts aggregating in excess of $65,000,000. At no time has there ever been a problem while they have demonstrated the ability to perform sizeable and difficult projects. In addition, we feel management is of the utmost integrity and willingly deal in good faith.

As surety for Richardson-Wayland Electrical Co., LLC, Argonaut Insurance Company with A.M. Best Financial Strength Rating of A and Financial Size Category of XII is capable of obtaining 100% Performance Bond and 100% Labor and Materials Payment Bond in the estimated contract amount of $12,000,000, and said bonds will cover the Project and any warranty periods as provided for in the Contract Documents on behalf of the Contractor, in the event that such firm be the successful bidder and enter into a contract for this Project. This letter is not an assumption of liability and is issued only as a reference request from our client.

Argonaut Insurance Company is licensed to transact surety business in the Commonwealth of Virginia and is listed on the U.S. Treasury Department's listing of Approved Sureties. We look forward to being called upon whenever it is felt we can be of service.

Sincerely,

Argonaut Insurance Company

Re: I-64 Active Traffic and Safety Management System (ATSMS)
State Project No.: 0064-007-913, C501

To whom it may concern:

It is our understanding that our valued client, Richardson-Wayland Electrical Co., LLC is being considered to act as Contractor on the captioned project.

Richardson-Wayland Electrical Co., LLC is one of our most valued surety clients. We consider the Company to be properly equipped, capably staffed, and well financed. It is our privilege to extend and/or consider supporting Suretyship to this Company on single contracts up to $15,000,000 and contracts aggregating in excess of $65,000,000. At no time has there ever been a problem while they have demonstrated the ability to perform sizeable and difficult projects. In addition, we feel management is of the utmost integrity and willingly deal in good faith.

As surety for Richardson-Wayland Electrical Co., LLC, Argonaut Insurance Company with A.M. Best Financial Strength Rating of A and Financial Size Category of XII is capable of obtaining 100% Performance Bond and 100% Labor and Materials Payment Bond in the estimated contract amount of $12,000,000, and said bonds will cover the Project and any warranty periods as provided for in the Contract Documents on behalf of the Contractor, in the event that such firm be the successful bidder and enter into a contract for this Project. This letter is not an assumption of liability and is issued only as a reference request from our client.

Argonaut Insurance Company is licensed to transact surety business in the Commonwealth of Virginia and is listed on the U.S. Treasury Department’s listing of Approved Sureties. We look forward to being called upon whenever it is felt we can be of service.

Sincerely,

Argonaut Insurance Company

No Open Complaints

"Open Complaints" reflect only those complaints against regulators for which a departmental investigation has determined that sufficient evidence exists to establish probable cause of a violation of the law or regulations. Only those cases that have proceeded through an investigation to the adjudication stage are displayed. State law prohibits the disclosure of any information about open complaints [Code of Virginia Section 54.1-108]. (http://leg1.state.va.us/cgi-bin/leqp504.exe?000+cod+54.1-108) Members of the public may review official records and obtain copies only after a complaint investigation is closed.

No Closed Complaints

"Closed Complaints" reflect complaints against regulators closed since 1990. Cases closed without disciplinary action are purged after three years in accordance with DPOR's record retention policy.

To inquire about closed complaints, see the department's Public Records Access (http://www.dpor.virginia.gov/recordsanddocuments/) or contact the department's Information Management Section at (804) 367-3583 or publicrecords@dpor.virginia.gov (mailto:publicrecords@dpor.virginia.gov).

Recovery Fund Claims include claims against a licensee where a judgment has been obtained for improper or dishonest conduct in a court of law. The Contractors Transaction Recovery Fund and the Real Estate Transaction Recovery Fund provide monetary relief to consumers who incur losses through the improper and dishonest conduct of a licensed contractor or licensed real estate professional. The funds are supported entirely by assessments paid by licensed contractors and licensed real estate professionals, not by any tax revenues.

**Narrative describing the Work Performed by the Firm identified as the Lead Contractor for this procurement.** If the Offeror chooses to submit work completed by an affiliated or subsidiary company of the Lead Contractor, identify the full legal name of the affiliate or subsidiary and the role they will have on this Project, so the relevancy of that work can be considered accordingly.

**Note:** This information pertains to work by key ITS subcontractor Digital Traffic Systems (DTS) and is provided as supplemental information relevant to Design Build Team capabilities.

DTS in partnership with Richardson Wayland Electrical Company (RWEC) under multiple Task Work Orders installed Dynamic Message Signs on both existing and newly constructed sign structures. In addition they brought power from the existing tunnels to each new sign location which included conduit installation, removing the existing power cables, reinstalling upgraded power cables, transformers and connected the same to switch gear within each tunnel. Sites included both NB and SB sides of I-77 at MM 45 as well as NB and SB approaches to the Big Walker Mountain and East River Tunnels.

The Scope of Work performed by RWEC and DTS included:

- Removal and disposal of existing inoperative DMS signs, sign structures and power cables
- Construction of new sign structures, foundations, conduits and junction boxes
- Installation of new DMS signs
- Installation of new equipment cabinets and internal hardware/electronics included onsite transformers
- Installation of fiber optic conduit and cabling
- Installation of DMS cabinet foundations and cabinets
- Commissioning of site power and communications infrastructure by extending power from existing tunnel switch gear
- Coordination with TOC staff for integration and MOT activities
- Restoration of all disturbed areas
- Provision of as-built structural and foundation plans
- Provision of shop drawings
- Provision of all MOT, project documentation and equipment testing

Upon completion of the construction / installation work under these Task Work Orders, DTS retained maintenance responsibility for these ITS devices under this contract.

Note: This information pertains to work by key ITS subcontractor Digital Traffic Systems (DTS) and is provided as supplemental information relevant to Design Build Team capabilities.

Under this contract, DTS completed numerous Task Work Orders in support of the NWRO and SWRO Intelligent Transportation System programs. During the period of performance for this contract, DTS completed nearly 200 Task Work Orders for the installation and upgrade of numerous ITS field elements including:

- Deployment of fiber optic conduit and cable  
- Deployment of CCTV sites and equipment  
- Deployment of Dynamic Message Signs  
- Deployment of Road Weather Information Systems

The value of Task Work Order deployment and installation work under this contract (exclusive of maintenance activities and specific I-77 DMS construction addressed separately) exceeded $6,000,000.

Upon completion of the construction / installation work under these Task Work Orders, DTS retained maintenance responsibility for these ITS devices under this contract.

If the Offeror chooses to submit work completed by an affiliated or subsidiary company of the Lead Contractor, identify the full legal name of the affiliate or subsidiary and the role they will have on this Project, so the relevancy of that work can be considered accordingly.

This project consists of furnishing and maintaining adequate material on hand to respond to Department's need for timely completion of traffic signal work, ITS system work, Fiber Optic communications lines and switches, and Closed Circuit Television Cameras (CCTV), in accordance with plans, sketches, specifications and provisions in the VDOT Central Operations Region. The contract value has averaged between $1.5 and $2.0 million per year.

Under multiple Task Work Orders, Richardson-Wayland performed the following services:

- Construction of new sign structures and foundations
- Construction of new signal poles and mast arms and foundations
- Installation of new equipment cabinets and internal hardware/electronics
- Installation of fiber optic conduit
- Trenching and installation of conduit and junction boxes
- Installation or construction of Vehicle Detection Systems
- Commissioning of site power and communications infrastructure
- Coordination with TOC staff for integration
- Restoration of all disturbed areas
- Provision of as-built structural and foundation plans
- Provision of shop drawings
- Provision of all documentation and testing

These projects consist of task-based inspection, preventative and corrective maintenance services. Annual inspection, inventory, conflict monitor testing and preventative maintenance services. Upgrades or changes (e.g. corrective maintenance) to existing signalized intersections may be needed, as follows:

- Replacement, modification, upgrade, removal or additions at existing signalized intersections.
- Replacement, modifications, upgrade, removal or additions of communications between signalized intersections.
- Replacement modifications, upgrade, removal or additions of ITS Systems, cameras, UPS, sign lighting, and overhead sign panels.

This work has exceeded $9.0 million and has average approximately $2.5 million per year, and include:

- Construction of new sign structures and foundations
- Installation of new DMS signs
- Installation of new equipment cabinets and internal hardware/electronics
- Installation of fiber optic conduit
- Trenching and installation of conduit and junction boxes
- Installation of DMS cabinet foundations and cabinets
- Installation of Wireless Vehicle Detection Systems
- Installation of Thermal (Camera) Vehicle Detection
- Installation of Adaptive Traffic Systems
- Installation of Wireless Communication Systems
- Installation of Wireless Traffic Counting Systems
- Commissioning of site power and communications infrastructure
- Coordination with TOC staff for integration
- Restoration of all disturbed areas
- Provision of as-built structural and foundation plans

h. Narrative describing the Work Performed by the Firm identified as the Lead Designer for this procurement. Include the office location(s) where the design work was performed and whether the firm was the prime designer or a subconsultant.

The purpose of the Wabash HOV Reversible Tunnel ITS System is to provide for a reversible HOV lane facility to access the City of Pittsburgh. AECOM, as part of a Design Build team, provided professional design services, specifically ITS Plans and system integration, for and in support of the Wabash Tunnel HOV Facility and the Port Authority of Allegheny County (PAAC). The roadway portion of this one-way reversible HOV facility supports High Occupancy Vehicles. Access is controlled by a series of inbound/outbound gates. Among the ITS elements AECOM was responsible for was a fiber optic communication network, controlled from a central workstation that operates the following: five CCTV cameras providing full CCTV coverage of the facility and remote parking area; 17 control access gates to the facility and remote parking area; six fiber optic blank out signs provide information to motorists as to whether the HOV facility is opened in either the inbound or outbound direction; and 16 overhead lane use control signs provide motorists with information on proper lane usage and direction. AECOM also designed Traffic Operation Center (TOC) and recently completed three years of ITS operations for the PAAC by staffing the Wabash Tunnel TOC.

AECOM provided two TOC operations staff: one TOC Supervisor and one TOC Technician to assist with observation and incident management. These services are provided for a period of sixteen hours per day, Monday – Friday (5am – 9pm). TOC staff performed the following on a daily basis:
- Maintain a Daily Systems Operations log;
- Identify and respond to System Equipment failures;
- Respond and manage HOV Incidents;
- Monitor and Perform Preventative Software Maintenance.

AECOM also operated an Incident Management Vehicle to serve as an Incident Command Station during non-recurring incidents. Upon completion of the systems integration phase, AECOM provided software maintenance support for a two-year period.

h. Narrative describing the Work Performed by the Firm identified as the Lead Designer for this procurement. Include the office location(s) where the design work was performed and whether the firm was the prime designer or a subconsultant.

The Los Angeles County Metropolitan Transportation Authority (Metro) worked in cooperation with the California Department of Transportation (Caltrans) to develop a package of solutions that will improve traffic flow and increase travel options on the I-10 and I-110 freeway corridors in Los Angeles County. This effort involves implementation of tolled ExpressLanes to support the Los Angeles County Congestion Reduction Demonstration (LA CRD) Program. The LA CRD Program includes many elements, such as: conversion of existing HOV lanes to tolled ExpressLanes; transit service enhancements; transit facility improvements; roadway infrastructure improvements; community outreach activities; and other mobility enhancing activities.

AECOM, as the lead engineering firm of the design-build team, provided roadway, bridge, ITS, toll system design services for the Los Angeles I-10 / I-110 ExpressLanes project as well as developing the dynamic pricing software and integration services. The ExpressLanes were constructed along 14.5 miles of I-10 east of downtown Los Angeles and 11.5 miles south of downtown. The project includes the design of 25 dynamic message signs, 25 CCTV cameras, 40 vehicle detectors, 20 toll gantries and communications; and toll collection systems including readers.

The I-595 Corridor Roadway Improvement project consists of the reconstruction of the I-595 mainline and all associated improvements to frontage roads and ramps from the I-75/Sawgrass Expressway interchange to the I-595/I-95 interchange, for a total length of approximately 10.5 miles. The design and construction cost of the project is approximately $1.2 billion. One of the major project components include the construction of three ground level reversible express toll lanes, serving express traffic to/from the I-75/ Sawgrass Expressway from/to east of S.R. 7, with a direct connection to the Florida’s Turnpike. These lanes will be operated as managed lanes with dynamic tolls to optimize traffic flow, and will reverse direction during peak travel times (eastbound in AM and westbound in PM). The project includes the Managed Lane Access Control Subsystem consisting of Status Changeable Message Signs, Lane Control Signals, Warning Gates, Barrier Gates and CCTV cameras dedicated to monitor the Managed Lanes and to provide the operators with the ability to safely manage the reversible flow system.

AECOM is responsible for overall management of all aspects related to the design and coordination with the Concessionaire. AECOM provided architectural services associated with a toll equipment building and three ITS communication hubs, and ITS infrastructure design services for the deployment of various ITS elements for the Managed Lanes and general purpose lanes. The ITS devices to be deployed as part of the project include 35 Changeable Message Signs, 7 Lane Control Signs, 52 CCTV cameras, 8 Freeway Dynamic Message Signs, 7 Arterial Dynamic Message Signs, 93 Microwave Vehicle Detectors, and 6 Highway Advisory Radio signs, and 3 warning gates and a barrier gate at every access point to the Express Lanes.

h. Narrative describing the Work Performed by the Firm identified as the Lead Designer for this procurement. Include the office location(s) where the design work was performed and whether the firm was the prime designer or a subconsultant.

The overall project intent is to upgrade VDOT’s existing analog communication system to the next evolution in communication technology which is digital transmission via an Ethernet network. AECOM is providing turnkey solution, which will include the plans, specifications, estimates (PS&E) and provide the full construction services of the communication upgrade project. Additionally, AECOM’s team will upgrade the existing Multimode fiber infrastructure to Single mode fiber in order to provide standard fiber network and further distance requirements. AECOM’s construction of the new fiber optic network topology design will provide higher optical fault tolerance with the deployment of distribution network rings. AECOM’s team will install this new digital network in parallel to the existing analog system. In addition to preparing the PS&E package, VDOT has partnered with AECOM to provide construction services for the Communication Upgrade. AECOM will develop a construction sequence, deployment and transition plan to minimize the downtime of equipment for the system. Under this Turnkey approach to Phase 1, AECOM’s team will provide the installation of approximately 30 miles of single mode fiber in order to replace the existing multimode fiber. Additionally, AECOM will deploy approximately 156 Layer 2 switches, 4 Layer 3 switches, and 81 terminal servers. Upon completion of the field infrastructure, AECOM provided assistance and training to converge VDOT’s existing system into the new Ethernet system.

h. Narrative describing the Work Performed by the Firm identified as the Lead Designer for this procurement. Include the office location(s) where the design work was performed and whether the firm was the prime designer or a subconsultant.

As the subcontractor to Carr & Duff Electric, AECOM was responsible for providing engineering design the for the design, installation, testing and integration of 21 Closed Circuit Television (CCTV) cameras, 9 Dynamic Message Signs (DMS), 21 vehicle detection (Video and Tag Reader), 1 Roadway Weather Information System (RWIS) Station and SONET OC-48 fiber network for 15 miles of expressway and major arterial roadway. This contract was broken into three phases of ITS deployment following the roadway reconstruction. This was the unique aspect of the project as it included the coordination with the four other contractors performing roadway reconstruction projects along the entire corridor. Coordination, communication, and cooperation were integral to the successful completion of this contract.

Proposal Price; (Specify the Total Lump Sum price in both numbers and words, this price shall equal to the total sum of the items listed above)

Lump Sum (LS): Ten Million – Eight Hundred Sixteen Thousand – One Hundred Dollars ($ 10,816,100)
Contractor not participating in Asphalt Material Price Adjustment. Therefore 6.3 A and 6.3B are not applicable and not included.
EXHIBIT 6.3 (c)
ADJUSTMENT FOR FUEL

VIRGINIA DEPARTMENT OF TRANSPORTATION
SPECIAL PROVISION FOR
OPTIONAL ADJUSTMENT FOR FUEL
DESIGN-BUILD PROJECTS

June 30, 2011

In the event the Design-Builder elects to seek adjustment for fuel items designated in the Price Proposal/Contract as Price Adjustment Items such items will be subject to price adjustment as set forth herein. Other items will not be adjusted, except as otherwise specified in the contract.

The Design-Builder will submit their monthly application for payment associated with eligible work packages with an adjustment up or down as appropriate for cost changes in fuel used on specific items of work identified in this provision. A master listing of standard items eligible for fuel adjustment is provided by the Department on its website at the following link http://www.virginiadot.org/business/resources/masteroptiona/fuelitems.pdf. The listing on the web site also includes the corresponding fuel factor for each item. The fuel usage factor for each item is considered inclusive of all fuel usage.

The amount of adjustment will be computed from the change in the indexes and the on-site fuel use as shown in the Department’s master listing of eligible items.

In order to be eligible for fuel adjustment under this provision, the Design-Builder shall clearly identify in its Price Proposal those pay items and the associated quantities it chooses to have fuel adjustment applied to its work packages. Items the Design-Builder claims in its application of payment for fuel adjustments must be properly designated in order to be considered for adjustment. Items not properly designated or left out of the Design-Builder’s Price Proposal will automatically not be considered for adjustment.

The monthly index price to be used in the administration of this provision will be calculated by the Department from the Diesel fuel prices published by the U. S. Department of Energy, Energy Information Administration on highway diesel prices, for the Lower Atlantic region. The monthly index price will be the price for diesel fuel calculated by averaging each of the weekly posted prices for that particular month.

For the purposes of this provision, the base index price will be calculated using the data from the month preceding the receipt of bids. The base Index price will be posted by the Department at the beginning of the month for all bids received during that month.

The current index price will be posted by the Department and will be calculated using the data from the month preceding the particular estimate being vouchered for payment.

The current monthly quantity for eligible items of work selected by the Design-Builder for fuel adjustment in its work packages will be multiplied by the appropriate fuel factor to determine the gallons of fuel to be cost adjusted. The amount of adjustment per gallon will be the net difference between the current index price and the base index price. Computation for adjustment will be made as follows:

\[ S = (E - B) QF \]

Where; \( S \) = Monetary amount of the adjustment (plus or minus)
\( B \) = Base index price
\( E \) = Current index price
\( Q \) = Quantity of individual units of work
F = Appropriate fuel factor

Adjustments will not be made for work performed beyond the original contract time limit unless the original time limit has been changed by an executed Work Order.

If new pay items are added to this contract by Work Order and they are listed in the Department's master listing of eligible items, the Work Order must indicate which of these individual items will be fuel adjusted; otherwise, those items will not be fuel adjusted. If applicable, designating which new pay items will be added for fuel adjustment must be determined during development of the Work Order and clearly shown on the Work Order form. The Base Index price on any new eligible pay items added by Work Order will be the Base Index price posted for the month in which bids were received for that particular project. The Current Index price for any new eligible pay items added by Work Order will be the Index price posted for the month preceding the estimate on which the Work Order is paid.

When quantities differ between the last monthly application of payment prepared upon final acceptance and the final application of payment, adjustment will be made using the appropriate current index for the period in which that specific item of work was last performed.

In the event any of the base fuel prices in this contract increase more than 100 percent (i.e. fuel prices double), the Department will review each affected item of work and give the Design-Builder written notice if work is to stop on any affected item of work. The Department reserves the right to reduce, eliminate or renegotiate the price for remaining portions of affected items of work.

Any amounts resulting from fuel adjustment will not be included in the total cost of work for determination of progress or for extension of contract time.

DESIGN-BUILD PROJECTS

June 30, 2011

In the event the Design-Builder elects to seek adjustment for steel items designated in the Price Proposal/Contract as Price Adjustment Items such items will be subject to price adjustment as set forth herein. If new pay items which involve steel are established by Work Order, they will not be subject to Price Adjustment unless specifically designated in the Work Order to be subject to Price Adjustment.

The Design-Builder will submit their monthly application for payment associated with eligible work packages with an adjustment up or down as appropriate for cost changes in steel used on specific items of work identified in the Price Proposal/contract in accordance with this provision. Provided at the end of this provision is a master listing of standard bid items the Department has determined are eligible for steel price adjustment. Inventoried materials from the listing of eligible items are specifically excluded for consideration. In addition, concrete items where reinforcing steel is normally included in the unit bid price for the item such as (but not limited to) drop inlets, median barriers, sound barrier walls, bridge railing and parapets, are not eligible for consideration under this provision.

The requirements of this provision shall apply only to material cost changes that occur between the date of the opening of the Price Proposal and the date the material is shipped to the fabricator. To be eligible for this price adjustment, Design-Builder is required to fill out the accompanying Form for Price Adjustment for Eligible Steel Items on Design-Build Projects and submit the same with its Price Proposal for the Project. By signing the Form and submitting it with its Price Proposal Design-Builder declares its intention to participate in the price adjustment in its contract with the Department. For the purposes of this provision, the prices listed on the Form for Price Adjustment for Eligible Steel Items on Design-Build projects are fixed for cost and adjustment calculations regardless of quantities incorporated into final design. Further, in order for steel items to be eligible for adjustment, once shipped to the fabricator, the items shall be specifically stored, labeled, or tagged, recognizable by color marking, and identifiable by project for inspection and audit verification.

Design-Builder shall upon request furnish documentation supporting the price per pound for eligible steel items as shown on the Form for Price Adjustment for Eligible Steel Items on Design-Build Projects furnished with its Price Proposal. Design-Builder must use the format as shown with this Form; no other format for presenting this information will be permitted. Design-Builder shall certify that all items of documentation are original and were used in the computation of the price per pound amount for the represented eligible pay items for the month the Price Proposal was opened. This documentation shall support the base line material price ("Base Price") of the steel item only. Base price per pound shall not include the following cost components: fabrication, shipping, storage, handling, and erection.

Failure to submit all documentation required or requested supporting the per pound prices on eligible steel items will result in Design-Builder being ineligible for a price adjustment of any or all steel items.

Price adjustment of each qualifying item under consideration will be subject to the following condition:

There is an increase or decrease in the cost of eligible steel materials in excess of 10 percent up to a maximum of 60 percent from the Base Price when compared with the latest published price index ("Price Index") in effect at the time material is shipped to the fabricator.

The Price Index the Department is using is based on The U.S. Department of Labor, Bureau of Labor Statistics, Producers Price Index (PPI) which measures the average price change over time of the specific
steel eligible item from the perspective of the seller of goods. The Master List table provided at the end of this provision indicates the Producers Price Index (PPI) steel category index items and the corresponding L.D. numbers to which VDOT items will be compared. Please note: The Producers Price Index (PPI) is subject to revision 4 months after original publication, therefore, price adjustments and payments will not be made until the Index numbers are finalized.

The price adjustment will be determined by computing the percentage of change in index value beyond 10 percent above or below the index on the date of opening of Design-Builder’s Price Proposal to the index value on the date the steel material is shipped to the fabricator (Please see included sample examples). Weights and date of shipment must be documented by a bill of lading provided to the Department. The final price adjustment dollar value will be determined by multiplying this percent increase or decrease in the index (after 10%) by the represented quantity of steel shipped, by the Base Price per pound subject to the limitations herein.

Price increase/decrease will be computed as follows:

\[ A = B \times P \times Q \]

Where:
- \( A \) = Steel price adjustment in lump sum dollars
- \( B \) = Average weighted price of steel submitted in Design-Builder’s Price Proposal for project in price per pound as listed on the Form for Price Adjustment for Eligible Steel Items on Design-Build Project
- \( P \) = Adjusted percentage change in PPI average from shipping date to date of opening of Price Proposal minus 10% (0.10) threshold
- \( Q \) = Total quantity of steel in pounds shipped to fabricator for specific project

The need for application of the adjustments herein to extra work will be determined by the Engineer on an individual basis and, if appropriate, will be specified on the Work Order.

This price adjustment is capped at 60 percent. This means the maximum \( P \) value for increase or decrease that can be used in the above equation is 50% (60%-10% threshold).

Calculations for price adjustment shall be shown separate from the monthly progress payment for work packages and will not be included in the total cost of work for determination of progress or for extension of contract time.

Upon Department review and due process consideration for redress by Design-Builder, any apparent evidence to unbalance the price supplied by Design-Builder in favor of items subject to price adjustment will result in ineligibility for Department participation under this provision.
FORM FOR PRICE ADJUSTMENT FOR ELIGIBLE STEEL ITEMS ON DESIGN-BUILD PROJECTS
Must be supplied with Price Proposal for Department Participation

(All prices to be supported by project-specific quotes)

DATE FOR RECEIPT OF PRICE PROPOSAL

Note: All prices (costs) are to include any surcharges on materials quoted. Vendors must include this surcharge with their cost. All prices (costs) are F.O.B. from the originating mill.

We/I, the undersigned, understand that by supplying prices for the steel items listed above and signing this form we are declaring our desire to apply the Special Provision For Steel Adjustment for Design-Build Projects to this Price Proposal and contract. The terms and conditions for participation are as stated in the Special Provision For Steel Adjustment for Design-Build Projects.

_________________________  ____________________
Design-Builder                Date
Sample Calculation of a Price Adjustment (increase)

Project has 450,000 lb. of eligible structural steel.

Design Builder's *f.o.b. supplier price for structural steel submitted in the Price Proposal is $0.2816 per pound.

Adjusted** BLS Producers Price Index (PPI) most recently published average at time of opening of the Price Proposal is 139.6.

All eligible steel shipped to fabricator in same month, October 2004.

Adjusted BLS Producers Price Index (PPI) most recently published average for month of October is 161.1

Adjustment formula is as follows:

\[ A = B \times P \times Q \]

Where;

- \( A \) = Steel price adjustment in lump sum dollars
- \( B \) = Average weighted price of steel submitted in the Price Proposal for Design-Build project in $ per pound
- \( P \) = Adjusted percentage change in PPI average from shipping date to date of submitted Price Proposal minus 10% (0.10) threshold
- \( Q \) = Total quantity of eligible steel shipped to fabricator in October 2004 for this project in pounds

\[ B = 0.2816 \]

\[ P = \frac{(161.1 - 139.6)}{139.6} - 0.10 = 0.054 \]

\[ Q = 450,000 \text{ lb.} \]

\[ A = 0.2816 \times 0.054 \times 450,000 \]

\[ A = 6,842.88 \text{ pay adjustment to Design-Build} \]
Sample Calculation of a Price Adjustment (decrease)

Project has 450,000 lb. of eligible structural steel.

Design-Builder's *f.o.b. supplier price for structural steel submitted in the Price Proposal is $0.2816 per pound.

Adjusted BLS Producers Price Index (PPI) most recently published average at time of opening of the Price Proposal is 156.6.

All eligible steel shipped to fabricator in same month, October 2004.

Adjusted BLS Producers Price Index (PPI) most recently published average for month of October is 136.3

Adjustment formula is as follows:

\[ A = B \times P \times Q \]

Where;

\( A \) = Steel price adjustment in lump sum dollars

\( B \) = Average weighted price of steel submitted in the Price Proposal for Design-Build project in $ per pound

\( P \) = Adjusted percentage change in PPI average from shipping date to date of submitted Price Proposal minus 10% (0.10) threshold

\( Q \) = Total quantity of eligible steel shipped to fabricator in October 2004 for this project in pounds

\[ B = \$0.2816 \]

\[ P = \frac{(156.6 - 136.3)}{156.6} - 0.10 = 0.030 \]

\[ Q = 450,000 \text{ lb.} \]

\[ A = 0.2816 \times 0.030 \times 450,000 \]

\[ A = \$3,801.60 \text{ credit to Department} \]

PROPOSAL GUARANTY

KNOW ALL MEN BY THESE PRESENTS, THAT WE __________________________ As principal, and ________________ Argonaut Insurance Company ____________ Surety, are held and firmly bound unto the Commonwealth of Virginia as obligee, in the amount of FIVE PERCENT OF THE DOLLAR VALUE OF THE BID, lawful money of the United States of America, for the payment of which, well and truly to be made, we bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally and firmly by these presents.

SIGNED, sealed and dated this ______ 7th ______ Day of ________________, 2013.

WHEREAS, the above said principal is herewith submitting its proposal for: I-64 Active Traffic and Safety Management System
PROJECT NUMBER: 0064-007-913, C501

NOW, THEREFORE, the condition of the above obligee is such, that if the aforesaid principal shall be awarded the contract upon said proposal and shall within the time specified in the Specifications after the notice of such award enter into a contract and give bond for the faithful performance of the contract, then this obligation shall be null and void; otherwise to remain in full force and effect and the principal and surety will pay unto the obligee the difference in money between the amount of the bid of the said principal and the amount for which the obligee may legally contract with another party to perform the said work if the latter amount be in excess of the former; but in no event shall the liability exceed the penal sum hereof.

POWER OF ATTORNEY

KNOW ALL MEN BY THESE PRESENTS That the Argonaut Insurance Company, a Corporation duly organized and existing under the laws of the State of Illinois and having its principal office in the County of Cook, Illinois does hereby nominate, constitute and appoint

Marc W. Boots, Richard Covington, Vickie Lacy, P. T. Osborn, Maria D. Zuñiga, Joseph R. Aulbert

Their true and lawful agent(s) and attorney(s)-in-fact, each in their separate capacity, if more than one is named above, to make, execute, seal and deliver, and on its behalf as surety, and as its act and deed any and all bonds, contracts, agreements of indemnity and other undertakings in suretyship provided, however, that the penal sum of any one such instrument executed hereunder shall not exceed the sum of $35,000,000.00

This Power of Attorney is granted and is signed and sealed under and by the authority of the following Resolution adopted by the Board of Directors of Argonaut Insurance Company

"RESOLVED, That the President, Senior Vice President, Vice President, Secretary, Treasurer and each of them hereby is authorized to execute powers of attorney, and such authority can be executed by use of facsimile signature, which may be witnessed or acknowledged by any officer or attorney, of the Company, qualifying the attorney or attorneys named in the given power of attorney, or execute in behalf of, and acknowledge as the act and deed of the Argonaut Insurance Company, all bond undertakings and contracts of suretyship and to affix the corporate seal thereto."

IN WITNESS WHEREOF, Argonaut Insurance Company has caused its official seal to be hereunto affixed and these presents to be signed by its duly authorized officer on the 18th day of July, 2013

FHWA:

This form must be completed, signed and returned with bid; and failure to do so may result in the rejection of your bid. THE CONTRACTOR SHALL AFFIRM THE FOLLOWING STATEMENT EITHER BY SIGNING THE AFFIDAVIT AND HAVING IT NOTARIZED OR BY SIGNING THE UNSWORN DECLARATION UNDER PENALTY OF PERJURY UNDER THE LAWS OF THE UNITED STATES. A SEPARATE FORM MUST BE SUBMITTED BY EACH PRINCIPAL OF A JOINT VENTURE BID.

STATEMENT. In preparation and submission of this bid, I, the firm, corporation or officers, agents or employees thereof did not, either directly or indirectly, enter into any combination or arrangement with any persons, firm or corporation or enter into any agreement, participate in any collusion, or otherwise take any action in the restraint of free, competitive bidding in violation of the Sherman Act (15 U.S.C. Section 1) or Article 1.1 or Chapter 12 of Title 18.2 (Virginia Governmental Frauds Act), Sections 59.1-9.1 through 59.1-9.17 or Sections 59.1-68.6 through 59.1-68.8 of the Code of Virginia.

AFFIDAVIT

The undersigned is duly authorized by the bidder to make the foregoing statement to be filed with bids submitted on behalf of the bidder for contracts to be let by the Commonwealth Transportation Board.

Signed at Roanoke City, Virginia, County (City), STATE, this day of November, 2013.

3. The bidder certifies to the best of its knowledge and belief, that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible or voluntarily excluded from covered transactions by any Federal department or agency;

(b) Have not within a three year period preceding this proposal been convicted of or had a civil judgement rendered against them for commission of fraud or a criminal offence in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated above; and

(d) Where the bidders is unable to certify to any of the statements in this certification, the bidder shall show an explanation below.

Explanations will not necessarily result in denial of award, but will be considered in determining bidder responsibility. For any explanation noted, indicate below to whom it applies, initiating agency, and dates of action. Providing false information may result in federal criminal prosecution or administration sanctions. The bidder shall provide immediate written notice to the Department if at any time the bidder learns that its certification was erroneous when submitted or has become erroneous by reason of change circumstances.

The undersigned is duly authorized by the bidder to make the foregoing statements to be filed with bids submitted on behalf of the bidder for contracts to be let by the Commonwealth Transportation Board.

PROJECT:

FHWA:

This form must be completed, signed, notarized and returned with bid; and failure to do so, may result in the rejection of your bid. A separate form must be submitted by each principal of a joint venture bid.

1. I, the firm, corporation or officers, agents or employees thereof have neither directly nor indirectly entered into any combination or arrangement with any person, firm or corporation or entered into any agreement, participated in any collusion, or otherwise taken any action in restraint of free competitive bidding in connection with such contract, the effect of which is to prevent competition or increase the cost of construction or maintenance of roads or bridges.

During the preceding twelve months, I (we) have been a member of the following Highway Contractor's Associations, as defined in Section 33.1-338 of the Code of Virginia (1970). (If none, so state).

NAME: Transportation

Location of Principal Office: Richmond, VA

2. I (we) have [ ], have not [ ], participated in a previous contract or subcontract subject to the equal opportunity clause, as required by Executive Orders 10925, 11114, or 11246, and that I [ ] have, [ ] have not [ ], filed with the joint Reporting Committee, the Director of the Office of Federal Contract Compliance, a Federal Government contracting or administering agency, or the former President's Committee on Equal Employment Opportunity, all reports due under the applicable filing requirements.

Note: The above certification is required by the Equal Employment Opportunity Regulations of the Secretary of Labor [41 CFR 60-1.7(b)(1)], and must be submitted by bidders and proposed subcontractors only in connection with contracts and subcontracts which are subject to the equal opportunity clause. Contracts and subcontracts which are exempt from the equal opportunity clause are set forth in 41 CFR 60-1.5. (Generally only contract or subcontracts of $10,000 or under are exempt.)

Currently, Standard Form 100 (EEO-1) is the only report required by the Executive Orders or their implementing regulations.

Proposed prime contractors and subcontractors who have participated in a previous contract or subcontract subject to the Executive Orders and have not filed the required reports should note that 41 CFR 60-1.7(b) (1) prevents the award of contract and subcontract unless such contractor submits a report covering the delinquent period or such other period specified by the Federal Highway Administration or by the Director, Office of Federal Contract Compliance, U.S. Department of Labor.

MINIMUM DBE REQUIREMENTS

PROJECT NO. 0064-007-913, C-501

FHWA NO.

*** INSTRUCTIONS ***

THIS FORM CAN BE USED BY THE CONTRACTOR TO SUBMIT THE NAMES OF DBE FIRMS TO BE UTILIZED ON THE PROJECT. THE CONTRACTOR SHALL INDICATE THE DESCRIPTION OF THE CATEGORY (S, M, SP or H) AND THE TYPE OF WORK THAT EACH DBE WILL PERFORM AND THE ALLOWABLE CREDIT PER ITEM(S). ADDITIONAL SHEETS TO SHOW THE ALLOWABLE CREDIT PER ITEM MAY BE ATTACHED IF NECESSARY. PLEASE NOTE: THE AMOUNT OF ALLOWABLE CREDIT FOR A DBE SUPPLIER IS 60% OF THE TOTAL COST OF THE MATERIALS OR SUPPLIES OBTAINED AND 100% FOR A DBE MANUFACTURER OF THE MATERIALS AND SUPPLIES OBTAINED. A CONTRACTOR MAY COUNT 100% OF THE FEES PAID TO A DBE HAULER FOR THE DELIVERY OF MATERIALS AND SUPPLIES TO THE PROJECT SITE, BUT NOT FOR THE COST OF THE MATERIALS AND SUPPLIES THEMSELVES.

DBE REQUIREMENT 3.0 %

PERCENT ATTAINED BY BIDDER 4.51 %

COMMONWEALTH OF VIRGINIA
DEPARTMENT OF TRANSPORTATION
CERTIFICATION OF BINDING AGREEMENT
WITH
DISADVANTAGED BUSINESS ENTERPRISE FIRMS

Project No.: CCE4-CE7-A13-EC01

This form is to be submitted in accordance with the Department's Special Provision for Section 107.15.

It is hereby certified by the below signed Contractors that there exists a written quote, acceptable to the parties involved, preliminary to a binding subcontract agreement stating the details concerning the work to be performed and the price which will be paid for the aforementioned work. This document is not intended to, nor should it be construed to, contain the entire text of the agreement between the contracting parties. This document does not take the place of, nor may it be substituted for, an official subcontracting agreement in those situations that may require such an agreement. A copy of the fully executed subcontract agreement shall be submitted to the Engineer within fourteen (14) business days after contract execution.

It is further certified that the aforementioned mutually acceptable quote and fully executed subcontract agreement represent the entire agreement between the parties involved and that no conversations, verbal agreements, or other forms of non-written representations shall serve to add to, delete, or modify the terms as stated.

The prime Contractor further represents that the aforementioned mutually acceptable quote and fully executed subcontract agreement shall remain on file for a period of not less than one year following completion of the prime's contract with the Department or for such longer period as provisions of governing Federal or State law or regulations may require. For purposes of this form, the term Prime Contractor shall refer to any Contractor utilizing a DBE subcontractor, regardless of tier, in which they are claiming DBE credit toward the contract goal.

Contractors further jointly and severally represent that said binding agreement is for the performance of a "commercially useful function" as that term is employed in 49 C.F.R. Part 26.55 (c), (d).

TO BE SIGNED BY THE SUBCONTRACTOR TO THE PRIME CONTRACTOR, AND ANY LOWER TIER SUBCONTRACTORS HAVING A CONTRACT WITH THE BELOW NAMED DBE FIRM
