

Logging Into the Bentley Connection Client

You must login to your Bentley connection client in order for your Bentley products to get a license – without a license the software may not work properly.

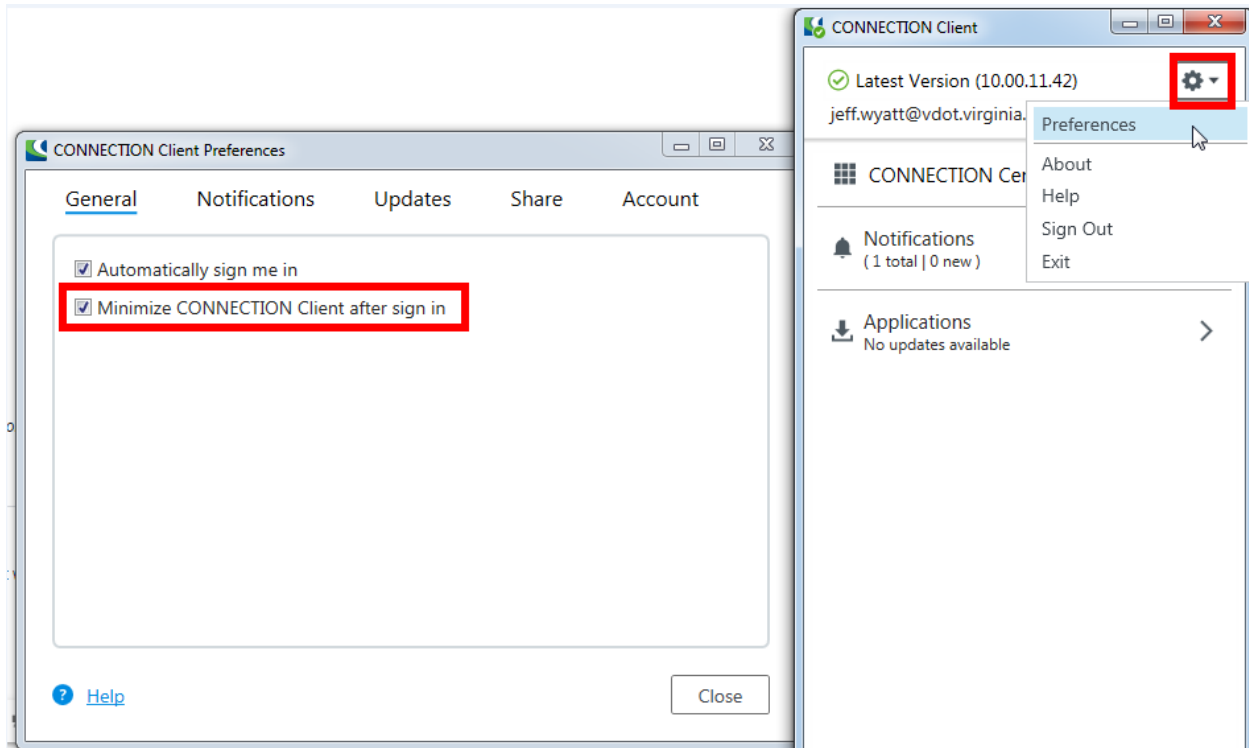

To login to the Bentley connection client you will use your full email address and just click in the Password field – this should automatically log you.

The screenshot shows a window titled "CONNECTION Client" with the Bentley logo at the top. Below the logo is a "Sign In" section. It contains an "Email" field with the text "teresa.cantrell@vdot.virginia.gov" and a "Password" field which is currently empty. A green "Sign In" button is positioned below the password field. Underneath the button is a blue hyperlink that says "Why sign in?". At the bottom of the window, there is a dark grey bar containing the text "Forgot password?" and "New User? Register Now".

Bentley Connection Client Job Aid

Now that you are logged into the Connection Client, you will want to minimize it. To minimize the client go to Settings (cog wheel upper right hand), Preferences, and then check the “Minimize CONNECTION Client after sign in”. This will prevent the Connection Client from popping up each time that you logon to the computer. It will log you in and stay minimized in your bottom right hand corner.

You can confirm that it's still running by checking the bottom right of your screen.
