All online classes require the users to have the software installed on their PC.

---

### OpenRoads Technology (4 days)

The course provides training for the following items related to OpenRoads.

Skills Taught:
- Introduction to Terrain
- Civil Geometry
- Vertical Alignment
- Corridor Geometry Generation
- Creating Templates
- Corridor Modeling Overview
- SuperElevation
- Designing with Corridor Modeling
- Cross Sections and Labeling
- Earthwork
- Civil Cells
- DTM
- Horizontal Alignment
- Corridor Modeling Overlay/Widening
- Roadway Designer-Intersection Design

### MicroStation Basics (2 days)

The MicroStation Basics Full class is designed for the new MicroStation user and builds a solid foundation in the concepts, tools and features found in the MicroStation drawing environment. Starting with setting up a drawing and concluding with plotting, students walk through typical workflows using the tools and features in MicroStation.

Skills Taught:
- Using General Tools
- Defining Element Attributes
- Controlling the Display of Designs
- Using AccuDraw and AccuSnap
- Creating Drawing Elements
- Selecting Elements
- Manipulating Elements
- Modifying Elements
- Working with Cells
- Annotating Designs
- Composing Designs and Drawings
- Printing and Publishing

### Stormwater Systems Design using PondPack (3 days)

Skills Taught:
- Have a better understanding of the basic principles of hydrology, hydraulics, and pond design.
- Explain what the tips and techniques are that apply to both design and review of Stormwater facilities.
- Apply PondPack for modeling and designing storm water detention.
- Understand how to use the PondMaker™ interface to design or redesign detention ponds.
- Apply the ModelBuilder tools to quickly create a model using existing data from many sources
- Use the new scenario creation wizard to quickly and easily create predevelopment and postdevelopment network scenarios

Target Audience: VDOT Drainage Employees

### ConceptStation (1 day)

This course is an introduction to the OpenRoads ConceptStation software. In this course you will learn how to create conceptual models that include roads, bridges, and ramps, with lighting, guardrail and street markings. You will also learn how to create new projects, custom templates, and modify the conceptual design.

Skills Taught:
- Create Roads
- Place a Bridge
- Create Ramp
- Create a Bridge Ramp
- Add City Furniture
- Add Street Markings
- Create abd Edit Templates
- Modify the Design
- Create and Connect Projects
