

Acknowledgements

The writers wish to express their appreciation to the Virginia Asphalt Association for the use of their material and expertise as well as instruction in this program. Their participation in this program not only makes the production of quality training materials possible, but improves the communication and cooperation between Industry and the Virginia Department of Transportation.

The writers also wish to thank:

The Joint AASHTO, FHWA, Industry Training Committee on Asphalt for the use of their training manual “HOT MIX ASPHALT CONSTRUCTION”.

The National Asphalt Pavement Association for the use of their videos.

The Asphalt Institute for their permission to use quotations, graphs, and illustrations from the “Asphalt Technology and Construction of Quality Hot Mix Asphalt Pavements”, and the “Asphalt Paving Manual”.

The LTAP for the use of their video on troubleshooting.

The writers further express their gratitude to all the personnel of the Virginia Department of Transportation who participate in this program; without their expertise, diligence and support, this production would not be possible.

NOTE: This manual is a practical guide and not to be used as a source for VDOT specifications.

Table of Contents

Acknowledgements	i
Table of Contents	ii
Certification Information	iii
Asphalt Field Agenda	iv
Inspection	1 -9
Chapter 1 Surface Preparation	1-1 – 1-9
Chapter 2 HMA Delivery	2-1 – 2-12
Chapter 3 HMA Placement	3-1 – 3-31
Chapter 4 Joint Construction	4-1 – 4-16
Chapter 5 Compaction	5-1 – 5-18
Chapter 6 SUPERPAVE Construction	6-1 – 6-7
Chapter 7 Mat Problems and Segregation	7-1 – 7-16
Chapter 8 Density Testing	8-1 – 8-38
Chapter 9 Paving Math Problems	9-1 – 9-9
Answers To Study Questions	1- 26
Appendices	
A Virginia Test Methods	A-1 – A-10
VTM - 6	
VTM - 22	
VTM - 76	
B Specifications/ Special Provisions	B-1 – B-23
C. Proficiency Test	C-1 - C -15

Asphalt Field Certification Information

Written Exam -

- Before taking the exam you must show photo identification and sign the Technician Certification Application.
- You are allowed 3 hours to complete the open-book exam with 38 multiple choice questions including math.
- You must pass with a minimum score of 70% and have one opportunity for re-testing

Proficiency Test -

- You must demonstrate applicable asphalt tests methods which are in the appendices of this manual.
- To schedule your proficiency test, contact the Materials Certification Training at (804)328-3158
- Before taking the proficiency test you must show photo identification and present a copy of proof of Nuclear Safety certification.

The written exam and the proficiency testing must be completed by December 31, 2011.

Your test results and card may be found at the VDOT University website listed below.

If you are enrolled in this class or hold any VDOT Materials certifications, do not register as a new user when you go to this site.

If you do not know your logon or password, call (804) 328-3158.
