of Transportation  
**Federal Highway  
Administration**

## **Highways for LIFE “Innovations” Webinars**

Each month, the Federal Highway Administration’s Highways for LIFE program, working with the agency’s National Highway Institute, sponsors “Innovations,” a web-based seminar focused on a different innovation aimed at reducing construction cost or time, or enhancing safety or quality, or all of the above. Typically, sessions run an hour and a half, and speakers include experts in the particular technology discussed. Discussions are lively and have received praise from throughout the highway community. They’re available for free on the Web. To sign up, see the Web Conference Events Calendar at [www.nhi.fhwa.dot.gov/resources/webconference](http://www.nhi.fhwa.dot.gov/resources/webconference).

Upcoming conferences, all from 2:30 to 4 p.m. Eastern time, include the following:

- **Innovative Bridge Inspection Techniques**, March 11
- **Connections Manual for Prefabricated Bridge Elements and Systems**, April 8
- **Safety Edge**, May 6
- **Pavement Smoothness**, June 10

This is a list of 4 upcoming webinars being coordinated by Highways for Life. If you have any comments or questions about them, contact Lizzie Morris at 202-366-0131 or at [Elizabeth.Morris@dot.gov](mailto:Elizabeth.Morris@dot.gov) for more information.
