

First guy

“So far the most exciting thing about being an inspector trainee is the knowledge that I am able to grasp very quickly for being able to learn on site, ahh, from being out here and with other inspectors who know the field very well.”

First lady

“It’s something different every day. You’re always learning something. You can put in a million pipe like we’re doing now and it’s never, never the same. It’s always changing.”

Second guy

“As a trainee you would have mentors and senior inspectors to help you along the way”

Third guy

“Just use all your resources you got in the department and you should do well. Anything you don’t know there is always someone you can contact to lead you in the right direction.”

Back to the first guy

“And they are able to share their knowledge with me while I am out here in the field and just having the people who already know it and to be able to experience it at the same time really pick it up very quickly. That’s exciting to me.”

Fourth guy

“Like becoming an inspector trainee you get so much information that makes you valuable to the company. VDOT is willing to go in and put all this time and money in to your education which is your future.”
