NEW RIVER VALLEY REGIONAL TRANSPORTATION PLAN

The Virginia Department of Transportation (VDOT) and the New River Valley Planning District Commission are partnering to evaluate the rural transportation system in the region and to recommend a range of transportation improvements that best satisfy existing and future transportation needs. This partnership will result in a regional plan that identifies needs based upon goals and objectives established by the region. Improving the transportation system remains vital to improving the quality of life and continued economic growth and prosperity in Virginia. Local benefits include: identification of transportation deficiencies and recommendations of remedies, assist with comprehensive plan updates, traffic impact studies-Ch.527, programming of transportation improvements, effects of land use and development. Providing for the effective, safe and efficient movement of people and goods is a basic goal of all transportation programs in the Commonwealth of Virginia.

2035 STATE HIGHWAY PLAN

Once completed, the regional transportation plan will be incorporated into Virginia's 2035 State Highway Plan. The statewide highway plan is developed by VDOT to identify needs and recommend solutions for the Commonwealth's Interstate and primary highway systems. The regional transportation plans serve as the building blocks for the State Highway Plan and are being developed in cooperation with planning districts commissions throughout the Commonwealth. The plans will complement the transportation plans that currently exist for metropolitan areas of Virginia.

MOVING FORWARD

The New River Valley Regional Transportation Plan and the 2035 State Highway Plan will be key tools for identifying and understanding the magnitude of Virginia's transportation needs and establish a foundation for making critical funding decisions for future highway projects.

These plans will provide real and tangible solutions to issues such as safety, capacity, and geometric deficiencies and will serve as key resources to determine future projects for implementation. The plans will address important regional issues such as pedestrian and bicycle facilities, transit operations, intermodal connectors and park and ride lots, all significant elements in creating a comprehensive transportation network for the future.

Once completed, the 2035 State Highway Plan will serve as a key component to VTrans2035, Virginia's State-wide Long-Range Multimodal Transportation Plan. VTrans2035 will rely heavily on the findings of the State Highway Plan to ensure other modes of travel, including rail, transit, aviation and shipping seamlessly blend into the highway network to form one single, integrated network.

PLANNING DISTRICT COMMISSION

The New River Valley region is located in southwest Virginia and surrounds the New River as it flows north to West Virginia on the district's northern edge. The New River Valley Planning District Commission (NRVPDC) serves Floyd, Giles, Pulaski, and Montgomery counties, the City of Radford, and the towns of Blacksburg, Christiansburg, Dublin, Floyd, Glen Lyn, Narrows, Pearisburg, Pembroke, Pulaski, and Rich Creek. The Appalachian Mountains lie along the northern edge of the district while the Blue Ridge mountains form the southern edge of the district.

The three largest employment sectors within the region are manufacturing, educational services, and retail trade. The unemployment rate in the area has remained just above the Virginia rate since 2000. Median household income in the counties has a range of \$31-35,000, which was below the Commonwealth in 2000. The City of Radford has a lower household income (\$24,654) due to the presence of full-time students. The NRVPDC is home to Virginia Tech and Radford University as well as New River Community College. Tourism is an expanding economic force in the New River Valley with a variety of recreational opportunities, particularly the Appalachian Trail, the Blue Ridge Parkway, Claytor Lake State Park, and the New River Trail State Park. Numerous historical societies promote an appreciation of the region's heritage through the many culturally significant sites in the area.

Mission

The NRVPDC serves the local governments in the area and their citizenry by providing a number of different services ranging from economic development to regional recycling. The purpose of the PDC is to promote regional cooperation, to coordinate the activities and policies of member local governments, and to provide planning assistance to local governments. The commission is financed by a combination of local, state, and federal funds.
