Anticipated Cost – $3.02 million

Purpose – Replace existing one-lane, structurally deficient bridge over Totier Creek.

Location – 0.05 miles south of Route 845 (Totier Creek Road).

Total Length – 0.06 mile

Improvements – Replace the existing one-lane timber deck bridge with a two-lane bridge with a concrete deck.

Welcome to the Virginia Department of Transportation’s design public hearing on the proposed project to replace the Route 726 (James River Road) bridge over Totier Creek in Albemarle County.

This public hearing is being held to provide an opportunity for any person, acting on his/her own behalf or representing a group or governing agency, to give VDOT comments and/or suggestions on the proposed project.

VDOT strives to ensure that all members of the community have the opportunity to participate in public decisions on transportation projects and programs affecting them. VDOT representatives are present to discuss the project and answer your questions.

A comment sheet is included in the handout for this meeting, and your input is encouraged. All oral and written comments received on this project will be included in a transcript for review by VDOT personnel, citizens and other interested parties.

Public Meeting

Project Overview

Anticipated Cost – $3.02 million

Purpose – Replace existing one-lane, structurally deficient bridge over Totier Creek.

Location – 0.05 miles south of Route 845 (Totier Creek Road).

Total Length – 0.06 mile

Improvements – Replace the existing one-lane timber deck bridge with a two-lane bridge with a concrete deck.
VDOT proposes replacing the existing one-lane timber deck bridge on Route 726 (James River Road) over Totier Creek. The bridge was built in 1932 and is considered structurally deficient. The new bridge will be constructed with a concrete deck and will accommodate two lanes of traffic. During the six-month construction period, VDOT will close Route 726 to through traffic at the bridge site with a posted detour route. The Totier Creek bridge carries approximately 1,100 vehicles per day. The design of this project is in compliance with the Stormwater Management Act, stormwater regulations and the annual stormwater management standards and specifications approved by the Virginia Department of Conservation and Recreation. The construction of this project will conform to the nationwide best management practices, VDOT specifications and special provisions, and the Virginia Department of Soil and Water conservation regulations. Also, during construction, every reasonable effort will be made to protect the environment with respect to dust and erosion control. Access to all properties will be maintained during construction. Potential impacts to the flood plains will be evaluated and addressed on this project.

Total cost: $3,020,000
Engineering of roadway plans: $800,000
Right of way acquisition and utility relocation: $120,000
Construction: $2,100,000

Cost is subject to change as the design is developed.

The following schedule has been proposed:
Public hearing: July 25, 2018
Public comment period ends: August 4, 2018
Right of way acquisition and utility relocation: Spring 2019
Construction begins: Spring 2023
Construction completion: Fall 2023
Project schedule is subject to change.

VDOT’s Culpeper District Environmental office has performed environmental reviews and coordination to obtain information about environmental resources in the project vicinity; to provide natural and historic resource agencies an opportunity to review and comment on the project during its development; and to identify opportunities for avoidance, minimization and mitigation of potential environmental impacts. The National Environmental Policy Act (NEPA) is applicable to this project and a Programmatic Categorical Exclusion has been developed in cooperation with the Federal Highway Administration and in accordance with federal guidelines. The NEPA document includes information from various technical reviews including those related to natural resources, water quality, threatened and endangered species, air quality and noise. In compliance with the National Historic Preservation Act, Section 106 and 36 CFR Part 800, information concerning the potential effects of the proposed project on properties listed in or eligible for listing in the National Register of Historic Places is also provided in the environmental documentation. The project will continue to be coordinated with the appropriate federal, state and local agencies as part of environmental review and approval processes required throughout project development and construction. All required environmental clearances and permits will be obtained prior to commencement of construction. Strict compliance with all environmental conditions and commitments resulting from regulatory approvals and implementation of VDOT’s specifications and standard best management practices will protect the environment during construction.

VDOT ensures nondiscrimination and equal employment in all programs and activities in accordance with Title VI and Title VII of the Civil Rights Act of 1964. If you need more information with regard to your civil rights on this project or special assistance for persons with disabilities or limited English proficiency, contact the project manager listed on the back of this brochure.

The replacement of the Route 726 bridge over Totier Creek will not require the displacement of any families, businesses or non-profit organizations. As the project is further developed, additional right of way for utility relocation or construction may be required beyond the proposed limits shown on the public hearing plans. The property owners will be informed of the exact location of the easements during the right of way acquisition process and prior to construction. Information about right of way purchase is discussed in VDOT’s Right of Way and Utilities brochure, “A Guide for Property Owners and Tenants.” Copies of this brochure are available on the VDOT website and from any VDOT Right of Way agent.

After the public hearing, information regarding right of way may be obtained from the Right of Way contact listed on the back of this brochure.
