Welcome to the Virginia Department of Transportation’s (VDOT) design public hearing on the Route 3 Passing lanes at Potomac Mills and Flat Iron in Westmoreland County.

This design public hearing is being held to provide an opportunity for citizens or organizations to provide VDOT comments and/or suggestions on the proposed project. VDOT strives to ensure that all members of the community have the opportunity to participate in public decisions on transportation projects and programs affecting them.

VDOT representatives are present to discuss the project and answer your questions.

A comment sheet is included in this meeting handout and your input is encouraged. All verbal and written comments received on this project will be included in a transcript for review by VDOT personnel, citizens and other interested parties.

VDOT staff will address questions and concerns raised as a result of this meeting before the project is presented to VDOT’s Project Development Engineer for approval.

Cost - $12.75 million

Purpose – Provide passing lanes on Route 3 between Potomac Mills and Flat Iron in Westmoreland County.

Improvements – Construct passing lanes in both directions from north of Winter Harbor Road (Route 639) to east of Longwood Road (Route 624).
VDOT's Fredericksburg District Environmental Office has performed environmental reviews and coordination to obtain information about environmental resources in the project vicinity; to provide natural and historic resource agencies an opportunity to review and comment on the project during its development; and to identify opportunities for avoidance, minimization and mitigation of potential environmental impacts. The National Environmental Policy Act (NEPA) is applicable to this project and a Categorical Exclusion has been developed in cooperation with the Federal Highway Administration and in accordance with federal guidelines. The NEPA document includes information from various technical reviews including those related to natural resources, water quality, threatened and endangered species, air quality, noise, etc. In compliance with the National Historic Preservation Act, Section 106 and 36 CFR Part 800, information concerning the potential effects of the proposed project on properties listed in or eligible for listing in the National Register of Historic Places is also provided in the environmental documentation.

The project will continue to be coordinated with the appropriate federal, state, and local agencies as part of the environmental review and approval processes required throughout project development and construction. All required environmental clearances and permits will be obtained prior to commencement of construction. Strict compliance with all environmental conditions and commitments resulting from regulatory approvals, and implementation of VDOT's specifications and standard best management practices will protect the environment during construction.

Representatives from VDOT's Environmental section are available to answer questions.

**PROJECT DESCRIPTION**

This project will modify the existing 2-lane undivided roadway on Route 3 (Kings Highway) to a 4-lane undivided roadway to provide an opportunity to pass slower moving vehicles. Left turn lanes will be added at key intersections.

The proposed improvements will:
- Provide a 4-lane undivided roadway for passing between Winter Harbor Road (Route 639) and Longwood Road (Route 624)
- Add an eastbound left turn lane on Route 3 at the intersection with Longwood Road (Route 624)
- Close the existing eastern connection of Fall Hill Road (Route 761) to Route 3
- Add a westbound left turn lane on Route 3 at the western intersection with Fall Hill Road (in front of VDOT facility)
- Remove the Winter Harbor Road (Route 639) connection at Route 3.

This project will be constructed in accordance with VDOT’s current road and bridge standards and specifications to comply with federal and state regulations pertaining to public welfare and safety.

The construction will be performed in such a manner that traffic will be maintained with a minimum of inconvenience to the traveling public. After the project is complete VDOT will maintain the road.

**Estimated Project Cost**

- **Total Project Cost:** $12,750,000
  - Preliminary Engineering: $1,250,000
  - Right of Way: $1,750,000
  - Construction: $9,750,000

**Anticipated Schedule**

- **Design Public Hearing:** November 29, 2017
- **Comment Period:** November 29, 2017 – December 9, 2017
- **Right of Way:** Early 2019
- **Advertise Project:** September 2020
- **Complete Construction:** Summer 2022

**Environmental Review**

VDOT’s Fredericksburg District Environmental Office has performed environmental reviews and coordination to obtain information about environmental resources in the project vicinity; to provide natural and historic resource agencies an opportunity to review and comment on the project during its development; and to identify opportunities for avoidance, minimization and mitigation of potential environmental impacts.

The National Environmental Policy Act (NEPA) is applicable to this project and a Categorical Exclusion has been developed in cooperation with the Federal Highway Administration and in accordance with federal guidelines. The NEPA document includes information from various technical reviews including those related to natural resources, water quality, threatened and endangered species, air quality, noise, etc. In compliance with the National Historic Preservation Act, Section 106 and 36 CFR Part 800, information concerning the potential effects of the proposed project on properties listed in or eligible for listing in the National Register of Historic Places is also provided in the environmental documentation.

The project will continue to be coordinated with the appropriate federal, state, and local agencies as part of the environmental review and approval processes required throughout project development and construction. All required environmental clearances and permits will be obtained prior to commencement of construction. Strict compliance with all environmental conditions and commitments resulting from regulatory approvals, and implementation of VDOT’s specifications and standard best management practices will protect the environment during construction.

Representatives from VDOT’s Environmental section are available to answer questions.

**Project Graphic**

This project will modify the existing 2-lane undivided roadway on Route 3 (Kings Highway) to a 4-lane undivided roadway to provide an opportunity to pass slower moving vehicles. Left turn lanes will be added at key intersections.

The proposed improvements will:
- Provide a 4-lane undivided roadway for passing between Winter Harbor Road (Route 639) and Longwood Road (Route 624)
- Add an eastbound left turn lane on Route 3 at the intersection with Longwood Road (Route 624)
- Close the existing eastern connection of Fall Hill Road (Route 761) to Route 3
- Add a westbound left turn lane on Route 3 at the western intersection with Fall Hill Road (in front of VDOT facility)
- Remove the Winter Harbor Road (Route 639) connection at Route 3.

This project will be constructed in accordance with VDOT’s current road and bridge standards and specifications to comply with federal and state regulations pertaining to public welfare and safety.

The construction will be performed in such a manner that traffic will be maintained with a minimum of inconvenience to the traveling public. After the project is complete VDOT will maintain the road.

**Civil Rights**

VDOT ensures non-discrimination and equal employment in all programs and activities in accordance with Title VI and Title VII of the Civil Rights Act of 1964. If you need more information or special assistance for persons with disabilities or limited English proficiency, contact VDOT’s Civil Rights Division at 540-899-4562, TTY/TDD 711.

**Right of Way**

The construction of this project will not require any displacement of families, businesses or non-profit organizations.

As we further develop and finalize the design of this project, additional easements for utility relocation may be required beyond the proposed right of way shown on the public hearing plans. The property owners will be informed of the exact location of the easements during the right of way acquisition process and prior to construction.

Information about right of way acquisition is discussed in VDOT’s brochure entitled “Right of Way and Utilities: A Guide for Property Owners and Tenants.” Copies of this booklet are available from a VDOT right of way agent. After this meeting, information regarding right of way may be obtained from the right of way contact listed on the back of this brochure.
