**Find out** about plans to construct a 1.5-mile auxiliary lane on southbound I-95 from Route 123 (Gordon Boulevard) to Prince William Parkway (Route 294) to relieve congestion and improve safety and operations.

The project also includes noise wall improvements and repaving the existing southbound I-95 general purpose lanes.

In compliance with the National Environmental Policy Act (NEPA) and 23 CFR Parts 771 and 772, an environmental document in the form of a Categorical Exclusion (CE) is being prepared, which will include a Preliminary Noise Analysis. VDOT has initiated environmental reviews and coordination with appropriate federal, state and local agencies to obtain information about environmental resources in the project's vicinity. When the environmental studies are complete and the Federal Highway Administration approves the CE for public availability, a public notice will be published in this newspaper.

**Stop by** between 6:30 p.m. and 8:30 p.m. to view displays and learn more about the project and its preliminary design. A presentation will begin at 7 p.m. Project staff will be available to answer your questions.
