

## WELCOME

### Study Introduction:

The Virginia Department of Transportation (VDOT), in coordination with the Federal Highway Administration (FHWA), is preparing an Environmental Assessment (EA) under the National Environmental Policy Act (NEPA) for the Bowers Hill Interchange Improvements Study.

The Bowers Hill interchange includes the junction of Interstate 664, Interstate 264, Interstate 64, U.S. Route 460, U.S. Route 58, U.S. Route 13, and Route 191 (Jolliff Road) in Chesapeake, Virginia.

For the purpose of this EA, a study area has been developed as the area in which potential impacts from the project could occur. The study area is large enough to encompass potential interchange improvement alternatives; this does not imply that impacts would occur to the entirety of the study area.

### The goals of this meeting are:

- To present the purpose and need for the study.
- To present the preliminary alternative concepts.
- To obtain input from the public on the alternative concepts that could be carried forward for analysis in the EA.
- To receive input on issues and/or resources to consider during the development of the EA.

Please use this opportunity to ask VDOT representatives questions and to discuss the study.
