Come see project information on the Hampton Roads Express Lanes (HREL) Norfolk segment 1A, a construction project that will convert the three existing general purpose lanes and shoulders into one part-time, high-occupancy express shoulder lane and three general purpose lanes for a total of two miles between Tidewater Drive and Patrol Road in the City of Norfolk. The I-64 east and west bridges over Tidewater Drive will be widened along with the I-64 east bridges over Granby Street, I-564 and E. Little Creek Road. Also, several existing bridges along the corridor will be rehabilitated. Spot widening will occur to accommodate the typical section along the corridor. This project will involve a change and/or break in limited access control.

Design-build contractor Allan Myers, along with VDOT representatives, will share projected traffic impacts and construction updates in an open-house style format with no formal presentation given.

In compliance with the National Historic Preservation Act, Section 106 and 36 CFR Pat 800, information concerning the potential effects of the proposed project on properties listed in or eligible for listing in the National Register for Historic Places will be provided in the project’s environmental documentation.

For more information on the HREL Norfolk project, visit https://64expresslanes.org/under_construction/norfolk.asp.
