JAMESTOWN-SCOTLAND FERRY MAY EXPERIENCE SERVICE INTERRUPTIONS DUE TO TIDAL CONDITIONS

SURRY – The Jamestown-Scotland Ferry may experience reductions in capacity and service outages due to predicted high tides on Oct. 29.

High water caused by heavy rain and high tides prevents the loading ramps on the docks from safely being raised and lowered onto the ferry boats. At this time, the potential for service interruptions is expected to occur starting as early as 6 p.m. Friday, Oct. 29.

If service is reduced or suspended, it will be restored as soon as waters recede, allowing ramps to be safely secured for loading vehicles.

Motorists should expect temporary delays and are encouraged to view the traffic queues approximately one-half mile from the boarding locations in real-time on the VDOT 511 cameras to determine if an alternate route is needed.

From the Surry Side:

- Take Route 10 to Route 258 to the James River Bridge (Route 17);
- Follow signs for Route 64 West. Exit onto Route 199 toward Williamsburg; and
- Follow to Route 31 (Jamestown Road).

From the Jamestown Side:

- Take Route 31 to Route 199. Make a right onto Route 199;
- Merge onto Route 64 East. Follow to the James River Bridge exit;
- After traveling over the bridge make a right onto Route 258, a right onto Route 10; and,
- Follow Route 10 to the Town of Surry traffic signal.

For updates on ferry service, motorists can call the ferry hotline at 1-800-VA-FERRY.

For additional travel alerts, motorists are encouraged to follow @VaDOTHr on Twitter, visit 511virginia.org, call 511, or download the free Virginia 511 mobile app.
