## **ROUTE 460 BRIDGE REHABILITATION PROJECT COMPLETED ON TIME IN ISLE OF WIGHT COUNTY**

**Roadway over Blackwater River fully open to traffic as of Nov. 18**

**ISLE OF WIGHT COUNTY** – As of Nov. 18, all lanes on Route 460 (Windsor Boulevard/General Mahone Boulevard) are open to traffic following the on-time completion of a bridge rehabilitation project over the Blackwater River in Isle of Wight County.

Virginia Department of Transportation (VDOT) crews removed the existing pavement surfaces, concrete sidewalks, and concrete parapets before repairing the concrete prestressed slabs and constructing new composite concrete decking and parapets. In addition to the bridge rehabilitation, work included the installation of approach guardrails and completion of minor approach widening in both directions.

The project rehabbed the existing 34-year-old bridge to extend the service life, improve the general condition rating of the superstructure and maintain safety.

Curtis Contracting, Inc. began construction on the \$2.87 million project in January 2022 which was completed on budget.
