PREPARE FOR TRAFFIC IMPACTS AT N. 5TH STREET AND I-95 IN RICHMOND AS BRIDGE REPAIR PROJECT BEGINS

Expect lane, shoulder closures

RICHMOND, Va. – As part of a contract with the Virginia Department of Transportation (VDOT), Kokosing Construction Company will be replacing the bridge superstructure on N. 5th Street over Interstate 95, beginning in late June. To accommodate this multi-phased bridge project, VDOT is working with Kokosing Construction Company to mitigate motorist impacts and ensure safety during construction.

N. 5th Street (I-95 southbound traffic):
Traffic travelling from I-64 westbound to I-95 southbound may experience delays while merging from two lanes down to one prior to the N. 5th Street bridge. Vehicles will be able to head straight into the city or proceed along the interstate ramp to access I-95 southbound.

Interstate 95: In conjunction with the bridge superstructure replacement, concrete repairs will be made on the bridge's substructure elements, including piers and abutments. Long-term shoulder closures on I-95 will be required to accommodate the work under the bridge. Additionally, temporary overnight lane closures will be implemented on I-95.

For more information on the project, visit: [Richmond - I-95 Bridge Rehabilitations - Projects | Virginia Department of Transportation \(virginiadot.org\)](https://www.virginiadot.org/projects/richmond-i-95-bridge-rehabilitations).

Anyone with questions about the project can call VDOT's customer service center at 800-FOR-ROAD (800-367-7623).

For the latest real-time traffic information or road conditions, call 511 or visit <http://www.511virginia.org>.
