

## **Maintenance of Traffic Requirements During Construction of Route 29 Solutions Projects**

### **Route 29/Rio Road Grade-Separated Intersection**

The Rio-Rt. 29 intersection may be restricted for 103 days from May 23 – Sept. 2, 2016, or from May 22 – Sept. 1, 2017, but not both periods.

Between May 23 – Sept. 2:

- Rio can be closed to east - west through traffic across Rt. 29.
- Rio can be closed to left turns from Rio to Rt. 29, and from Rt. 29 to Rio.
- Three northbound lanes and two southbound lanes will be maintained on Rt. 29 from 6 am to 9 pm.
- Right turns from Rt. 29 to Rio and from Rio to Rt. 29 will be permitted.

Before May 23 and after Sept. 2:

- Four through lanes in each direction on Rt. 29 will be maintained from 6 am to 9 pm.
- Two through lanes in each direction on Rio Road will be maintained from 6 am to 9 pm.
- All roadway connections and all existing operational movements (left and right turns) will be maintained from 6 am to 9 pm.

A temporary signalized crossover at existing Berkmar and Rt. 29 will provide access to and from Rt. 29 during construction. This crossover can be used to detour around Rio for northbound and southbound traffic, and can be used to access the east side of Rt. 29 by southbound Berkmar traffic.

### **Route 29 Widening, Polo Grounds Road to Towncenter Drive**

During construction two lanes in each direction and all left turns and all right turns will be maintained from 6 am to 9 pm.
